The video of the very first moon landing of the apollo 11 mission in 1969! Neil Armstrong was the first man to set foot on the moon with his now legenday words "One small step for man, a giant leap for mankind." This is a truly amazing video and it was in 1969!!! If you think about it, you have orders of magnitude more processing power in your mobile phone than they did in the whole space craft!! Incredible!
